

Garden and Canning Club

A Garden and Canning Club was organized in one community. The Garden Club having an enrollment of 21 members and nine of these members organized a Canning Club which did some very excellent work. The Canning Club members canned over two hundred quarts, in addition to helping with the home canning. They exhibited at two community fairs, at the county Inter-Community Fair and at the State Fair. At the State Fair these nine club members won 16 premiums in the Boys' and Girls' Department and 11 premiums in open competition in the culinary department.

Canning Club Exhibit at County Inter-Community Fair.

This Club is taking a very active part in the work of the community in which it is organized. With money that they have earned at community entertainments they have purchased a set of dishes for the use of the community.

This Club was organized in a community that was not yet organized for co-operation in carrying on Extension work. As a result of the work the Extension Agent has been able to do thru this club the community is now organized for a definite program of Extension work. The club work adopted in this community for the coming year includes besides a continuation of the Garden and Canning Club, a Garment Club, and a Corn and Pig Club.
